EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record fail to teach or suggest ROM comprising a portioned source line associated with each of N columns, the portioned source line including a plurality of source line segments, each segment being decodable based on a bank select signal that is operable to select a bank and on a column address (claim 1); a code portion for generating a plurality of local source line decoder circuits corresponding to row banks, each local source line decoder circuit operating responsive to at least one bank select signal (claim 11) and a method of operating a ROM comprising the step of deactivating a source line segment associated with ROM cell location, thereby developing a read voltage differential on a global bit line based on a column address and a bank select signal (claim 18).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
